

# Adam Robinson

SENIOR SOFTWARE ENGINEER · Providence, RI

adamrobinson.tech · GitHub · LinkedIn · adam@adamrobinson.tech

---

## SUMMARY

Senior software engineer and technical lead with 15+ years of experience building production software. My work spans full-stack feature development, backend service architecture, and platform modernization. I combine hands-on development with technical leadership, from defining goals and technical approaches to coordinating delivery and mentoring engineers.

---

## EXPERIENCE

### MojoTech · Senior Software Engineer / Technical Lead

Feb 2015 - Present · Providence, RI

Software consultancy. Embedded with client teams across 15+ engagements. **Selected client engagements:**

**- iCapital · Senior Software Engineer, Consultant · May 2024 - present**

Develop features across iCapital's investment platform. Helped architect and implement a Rails backend service for the Nominees reimplementation, supporting specialized international investments. Worked on backend translation migration using Mobility. Currently migrating custom frontend forms to a shared internal package.

**- Healthcasts · Technical Lead · Oct 2022 - May 2024**

Led development across publishing, authentication, and AI platform initiatives, helping define goals and technical approaches while implementing throughout. Co-designed and built a headless CMS workflow with another engineer, reducing a core process from weeks to a couple of days. Helped define and led an Auth0 authentication strategy requiring an extensive authentication-layer and backend rewrite. Led development and implemented parts of the AI platform.

**- Angi · Senior Software Engineer, Consultant · Nov 2020 - Sep 2022**

Developed Java/Vue.js features for the unified quiz flow during the Angi rebrand, then React/Rails features at Handy and Contentful/Next.js pages at Angi. Managed interns rebuilding the Careers page, then took over the remaining implementation after their internships ended.

**- Shell Techworks · Software Engineer · Jun 2018 - Jul 2019**

Built a React and Node.js application that evaluated least-cost decommissioning paths for end-of-life offshore oil platforms. Used an onsite Google Design Sprint to narrow scope and deliver the MVP on schedule.

*Additional client engagements: Two Sigma · Welltok · Credit Karma · Schneider Electric · School of Motion · Amica Mutual · AutoRaptor.*

### Beacon Mutual Insurance · Associate Developer / Production Control

Mar 2011 - Feb 2015 · Warwick, RI

Progressed from deployment and environment management to full-stack and database development, building claims, policy, financial transaction, and payment systems in a regulated environment.

---

## SKILLS

**Core stack** · TypeScript, React, Ruby on Rails, Node.js, SQL

**Delivery range** · Vue, Next.js, SvelteKit, Java, PHP (legacy)

**Platform work** · AWS/EC2, GitHub Actions, Auth0, Strapi, Contentful, Mobility

**Leadership** · System design, goal setting, technical approach, delivery coordination, mentoring
