

Adam Robinson

SENIOR SOFTWARE ENGINEER · Providence, RI

adamrobinson.tech · GitHub · LinkedIn · adam@adamrobinson.tech

SUMMARY

I have 15+ years building and modernizing production systems across fintech, healthcare, industrial technology, and enterprise products. I take ownership of unfamiliar or difficult parts of a product: read the code, learn the team's conventions, and work from the paths closest to the problem. I prefer well-scoped changes that ship and leave the system and the handoff to the next engineer in better shape. Recent work spans React, TypeScript/Node.js, and Rails.

EXPERIENCE

MojoTech · Senior Software Engineer

Feb 2015 - Present · Providence, RI

Software consultancy. Embedded with client teams across 15+ engagements. **Selected client engagements:**

- iCapital · May 2024 - present

Co-designed a Rails service that consolidated bulk nominee processing for thousands of investments. Expanded localization across static and database-backed content and led the team's Supernova v1-to-v2 component library migration.

- Healthcasts · Oct 2022 - May 2024

Partnered with Healthcasts across publishing, infrastructure, and identity. Delivered a headless CMS that cut time-to-publish from weeks to days, then modernized EC2, deployed databases, and the backend to TypeScript. Unified auth between legacy PHP/CMS and React/CMS applications, enabling the next phase of an AI-platform overhaul.

- Angi · Nov 2020 - Sep 2022

Adapted to an expanded scope during Angi's rebrand, helping consolidate HomeAdvisor flows into a shared Angi quiz flow in Java/Vue. Also worked in Rails/React at Handy and Next.js/Contentful at Angie's List, took ownership of a Careers rewrite, and guided interns through their first production release.

- Shell Techworks · Jun 2018 - Jul 2019

At Shell Techworks, a startup-style group inside Shell, built a React/Node.js application for evaluating least-cost offshore-platform decommissioning paths. Used Ant Design and LoopBack, iterating quickly to deliver the MVP onsite in Boston.

Additional client engagements: Two Sigma · Welltok · Credit Karma · Schneider Electric · School of Motion · Amica Mutual · AutoRaptor.

Beacon Mutual Insurance · Associate Developer / Production Control

Mar 2011 - Feb 2015 · Warwick, RI

Progressed from deployment and environment management to full-stack and database development, building claims, policy, financial transaction, and payment systems in a regulated environment.

SKILLS

Core stack · TypeScript, React, Ruby on Rails, Node.js, SQL

Delivery range · Vue, Next.js, SvelteKit, Java, PHP (legacy)

Platform work · AWS/EC2, GitHub Actions, Auth0, Strapi, Contentful, i18n, component-library migration

Leadership · System design, technical discovery and scoping, embedded consulting, cross-team delivery, mentoring
