

adam robinson

SENIOR SOFTWARE ENGINEER

Providence, RI

adamrobinson.tech · GitHub · LinkedIn · adam@adamrobinson.tech

SUMMARY

Senior software engineer and technical lead with 15+ years delivering and modernizing production systems across fintech, healthcare, and enterprise. Backend-leaning full-stack engineer across Rails, TypeScript/Node.js, and React. Ramps quickly in complex codebases, turns ambiguous work into shippable plans, and builds agent-assisted workflows with explicit review and verification.

EXPERIENCE

MojoTech · Senior Software Engineer / Technical Lead

Feb 2015 - Present · Providence, RI

Delivered 15+ client projects as an embedded senior engineer and technical lead across product delivery, platform modernization, and production systems. Selected clients:

- **iCapital · Senior Software Engineer, Consultant · May 2024 - present**

Co-designed a Rails service that consolidated bulk nominee processing for thousands of investments. Expanded localization across static and database-backed content and led the team's Supernova v1-to-v2 component library migration.

- **Healthcasts · Technical Lead · Oct 2022 - May 2024**

Led phased modernization of a medical publishing platform. Built a Strapi and React publishing pipeline, modernized AWS infrastructure, and unified authentication across products with Auth0, improving publishing throughput and unblocking an AI initiative.

- **Angi · Senior Software Engineer, Consultant · Nov 2020 - Sep 2022**

Shipped across three post-merger codebases for HomeAdvisor, Handy, and Angie's List using Vue/Java, Rails/React, and Next.js/Contentful. Mentored interns through a live Careers page launch and their first production release.

- **Shell Techworks · Software Engineer · Jun 2018 - Jul 2019**

Built a React and Node.js application that evaluated least-cost decommissioning paths for end-of-life offshore oil platforms. Used an onsite Google Design Sprint to narrow scope and deliver the MVP on schedule.

Earlier clients include School of Motion, Amica Mutual, and AutoRaptor.

Beacon Mutual Insurance · Associate Developer / Production Control

Mar 2011 - Feb 2015 · Warwick, RI

Progressed from deployment and environment management to full-stack and database development, building claims, policy, financial transaction, and payment systems in a regulated environment.

SKILLS

Backend TypeScript, Ruby, SQL, Elixir · Node.js, Ruby on Rails, Express, Phoenix

Frontend React, SvelteKit, Vue, Next.js

Platform AWS, Vercel, GitHub Actions · Git, Prisma, Strapi, Contentful, Auth0

AI Codex, Claude, Pi, GitHub Copilot · agent instructions, skills, verification workflows
